PRESS RELEASE

2QTR 2004

New website and corporate identity brings new features

West Chester, OH, July 12, 2004: DK Web Designs, LLC today launched the newly designed company website featuring new services and customer features. The new website now offers its customers online management of support requests, a knowledge base, and an *Online Billing Center* for managing outstanding projects and balances. A secure payment portal has been integrated as well giving customers the opportunity to pay by MasterCard or Visa.

Although the *Online Billing Center* will provide a way for customers to view their outstanding account, DK Web Designs will still choose to send paper invoices for all transactions and recurring payments. Once the *Online Billing Center* is widely used by customers, DK Web Designs may switch to an email reminder system to supplement the *Online Billing Center*. This would allow DK Web Designs to terminate paper billing which would reduce the cost of each produced invoice.

Along with its new website, DK Web Designs, LLC has changed its corporate identity. DK Web Designs, LLC now displays a new logo and theme with the desire to increase company recognition.

About DK Web Designs, LLC

DK Web Designs, LLC is a premier provider of comprehensive technical Internet solutions. Founded in 2000 by Donovan Joyner and Kent Landvatter, DK Web Designs has remained a small company with young, creative and energetic employees. Its main focus is web development, graphic design, and multimedia design for the small business and other small to medium sized organizations. The innovation specialists that make up DK Web Designs is a group of inspired students chosen for their intelligence, motivation, business interest, and general intellectual curiosity. Unlike the MBA molded minds of the typical consultant boardroom, DK Web Designs' team lacks "traditional business" ideology constraints, and instead focus on raw intelligence and the energy of youth. DK Web Designs is headquartered in Cincinnati, OH. For more information, visit www.dkwebdesigns.com
